

Slide Through Images

Slide Through Images

Project Overview

The 'Slide Through Images' project is a simple yet elegant image slider that allows users to navigate through a collection of images seamlessly. It is designed with a responsive layout, making it adaptable to various screen sizes, and provides a smooth user experience with auto-sliding functionality and navigation controls.

Features

- **Auto Slide:** Images automatically transition every 5 seconds.
- **Navigation Dots:** Users can jump to any image by clicking on the corresponding navigation dot.
- **Prev/Next Controls:** Buttons to manually navigate to the previous or next image.
- **Responsive Design:** Adaptable to different screen sizes with a 16:9 aspect ratio.

Technologies Used

- **HTML5:** Markup language used to structure the content of the web page.
- **CSS3:** Used for styling and creating a visually appealing layout.
- **JavaScript:** Adds interactivity to the image slider, enabling the auto-slide feature and navigation controls.

How to Use

1. Clone the repository from GitHub:

...

```
git clone https://github.com/Vishverwasma/slide-through-images.git
```

...

2. Navigate to the project directory:

...

```
cd slide-through-images
```

...

3. Open the `index.html` file in your browser to view the image slider.
